#### **DETAILED ACTION**

Page 2

1. The information disclosure statement filed October 13, 2005 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 which requires a legible copy of the references (i.e. publications). It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

# **Drawings**

2. The drawings are objected. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after

Art Unit: 2856

the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

In Figure 2, the block elements need to be labeled with its description.

## Claim Objections

3. Claim 1 is objected to because of the following informalities. Appropriate correction is required.

In claim 2, line 12, the phrase "the switching point" should be changed to – a switching point --. In lines 14-15, the phrase "the rotational viscosity coefficient" should be changed to – a rotational viscosity coefficient --. In lines 15-16, the phrase "the theoretical values" should be changed to – theoretical values --. In lines 19-20, the phrase "the Miesovicz shear viscosity coefficients" should be changed to – the Miesovicz shear viscosity coefficients --.

### Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/553,180

Art Unit: 2856

5. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 2-3, the phrase "by fitting Ericksen-Leslie theoretical values" is indefinite. How is this fitted to the measured response characteristics? Please clarify. In lines 5-6, the phrase "measuring ON response characteristics of a liquid ... alignment" is indefinite. What is considered a "ON response characteristics"? How does one measure and determine this as a "ON response"? In lines 8-9, the phrase "measuring OFF response characteristics ... cell" is indefinite. What is considered a "OFF response characteristics"? How does one measure and determine this as a "OFF response"?

In claim 2, lines 2-3, the phrase "by fitting Ericksen-Leslie theoretical values" is indefinite. How is this fitted to the measured response characteristics? Please clarify. In lines 15-16, how is the rotational viscosity coefficient fitted by the theoretical values? In lines 20-21, how is the shear viscosity coefficients fitted by theoretical values?

### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references cited are related to liquid crystal display includes a rotational viscosity coefficients.

Application/Control Number: 10/553,180

supervisor, Hezron E. Williams can be reached on (571) 272-2208. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
